AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH
Faculty of Science and Technology
Department of Computer Science
CSC 1205 Object Oriented Programming – 1 (JAVA)

Final Term Project Evaluation   **Semester:** Spring 2023-2024   **CO Assessed:** CO3   **Total Marks:** 40

Student(s) must bring the completed project evaluation form to participate in the project evaluation process.

CO3 [PO-h-1]: Determine and validate the appropriate system functional requirements, as well as their design for a real-life based application, in order to facilitate communication and analytical abilities.

Assessment Attribute/Criteria	Missing/Incorrect (0)	Inadequate (1)	Moderate (2)	Satisfactory (3)	Good (4)	Excellent (5)
Evaluation Criteria	Evaluation Definition					
Functional Requirement	Properly plan a real-life scenario-based project with proper functional requirement identification for the Object Oriented Programming project development activities.					
Role based Responsibility	Proper planning and execution of role-based responsibility allocation.					

The following CO3 and Total Marks sections are to be filled out by the Course Teacher during the Project evaluation period.

SL	Student Name	Student ID	Section	Marks acquired in CO3 (10) Evaluation Criteria Functional Requirement (5)	Role based Responsibility (5)	Total Marks Acquired (40) VIVA 10 / DEMO 10 / CO3 10 / CODE 10
1	Fatima Hridi	23-51550-2	R			
2	MD. Morshed Milton	23-51579-2				
3	Israt Jahan Tisha	23-51587-2				
4	MD. Naimur Rahman Saad	23-51601-2				

** Students need to fill out the **Student Name, ID, Section**, Project Title, Contribution in %, Major Contributed Features, Project Link and the Project Description in accordance with their own project work.*

Project Title	Space Finder

Project Requirements	☐ At least 3 Types of Entity ☐ Encapsulation ☐ Inheritance ☐ Abstraction ☐ Polymorphism	Entity Management ☐ Insert ☐ Get ☐ Update ☐ Delete	☐ Package ☐ Exception Handling ☐ File I/O	**GUI Frames** ☐ Login/Register ☐ Home Page ☐ Management Pages

Individual	Student SL-1	Student SL-2	Student SL-3	Student SL-4
Contribution in % Total: 100%	25%	23%	22%	30%
Major Contributed Features	1. Registered customers list and informations 2. Remove registered customers. 3. Welcome,AdminLogin, AdminPanel,CustomerData page GUI.	1. SignUp system. 2. Customer add. 3. SignUp page GUI. 4. 5.	1. Log in system. 2. Customer search. 3. Login page GUI. 4. 5.	1. Apartment & Office list. 2. Apartment & Office add,remove. 3. SpaceList, SpaceEdit, SpaceInfo,Payment page GUI.

***Complete this part along with the parts mentioned in previous page prior to your project defense and submit accordingly.

Project Title	Space Finder
Description	"Space Finder" is like a helpful tool for finding apartments or offices to rent. Space finder will help us to rent office or apartment according to our choice. A customer can create an account and login to this software and choose their desired space. This will help them from the hassle of finding a space by searching in offline and from the searching expenses and this will save them time. Admin can add and remove available apartments or offices according to his choices. Admin can also remove customers. Customers can book their desired space through online payment which will save them lot of time and from many hassles.

*Project Timeframe

Fill out the below with the number of days required according to your project work.

Requirement Analysis/Planning	Coding	Compilation of the whole Project	Testing	Total
2 days	10 days	2 days	1 day	15 days

*Individual Contributions

Fill out the below describing your role in your group that justifies your contribution according to your project work. The serial of IDs must match the serial of the previous page. Font size should be 10 for this part.

SL	Student ID	Justification on Individual Contributions
1	23-51550-2	Made customer list. It is an admin tool where admin can see the registered customer's informations and also delete a customer's account. Also made admin login system, AdminLogin, AdminPanel, Welcome page.
2	23-51579-2	Made SignUp system where a customer can register his account if he is new to this software. If someone registers, it will add the informations in a file and keep it save for later to login. Also build up the GUI for the SignUp page.
3	23-51587-2	Made Login system where a registered customer can login to the software and get access to the spacelist page. It also includes search and match system where the system search and matches the provided username and password from the existing customers list.
4	23-51601-2	Made apartment and office list, added add/remove apartment and office option for admin to update the spaces. Made a page that shows the details about apartment and office selected by a customer. Also made a payment method page. Lastly, made the codes under package.

Please note that the formatting of this file must be maintained. Table sizes, writing font style, and font size must not be changed. The components of this page must remain within this page.
